PROFILE

After first trimester in my course, I started mixing pre-recorded sessions in Pro Tools just to get my hands on it. I can set up a studio session in Audient T1 and can record instruments at a basic level. I might not have a large employment experience but I've got a strong will to learn. With my high-school education, I tend to add logic which helps me with troubleshooting. As a delivery expert in Domino's, I learned how to work as a team.
